LinkedIn: https://www.linkedin.com/in/alissonluanpeloso/

A Computer Science graduate from UFFS with over three years of full-stack development experience, excelling as a team member, leader, and technical lead. Proficient in PHP 8+, Laravel, Vue, Livewire, and PostgreSQL, with hands-on expertise in Docker and Kubernetes. Experienced in real-time updates (WebSockets), asynchronous jobs, caching strategies, and cloud-based solutions, with a strong focus on developing workspace tools and file management systems. Passionate about continuous learning, leadership, and team efficiency, leveraging technical and administrative expertise to drive impactful results.

Work History

Tech Lead and Full-Stack Developer
Optidata Cloud, Chapecó, Brasil: 03/2023 – now

Optidata Cloud:A leading cloud solutions provider with over a decade of experience, specializing in B2B workspace and cloud solutions development.

- **Developed and maintained** a comprehensive workspace platform, creating key tools and seamless integrations between applications like File Manager, Chat, Video Conferencing, Business Social Network, Document Editor, Documentation Platform, and Calendar.
- **Led a team** of 15+ developers, fostering a collaborative and growth-oriented environment while ensuring timely feature delivery while fostering a strong team culture.
- **Contributed to architectural decisions**, driving the technical direction and scalability of projects.
- **Managed deployment** processes and ensured the smooth operation of production environments.
- **Optimized application performance** and enhanced user experience (UX) by implementing best practices and performance improvements.

Technologies and tools: PHP, Laravel, Javascript, Livewire, VueJS, ReactJS, Redis, Postgres, SQLite, Websocket, Workers, Caching, Multi-tenancy and multi-region management, Docker, Kubernetes, Github, Scrum, RestAPI, Clean Architecture and Clean Code.

Junior Software Developer
Optidata Cloud, Chapecó, Brasil: 10/2022 – 03/2023

- **Assisted in developing** key features and integrations for the workspace platform, gaining experience in Laravel, Vue, and multi-region cloud environments.

Technologies and tools: PHP, Laravel, Javascript, Livewire, VueJS, ReactJS, Redis, Postgres, SQLite, Websocket, Workers, Caching, Multi-tenancy and multi-region management, Docker, Kubernetes, Github, Scrum, RestAPI, Clean Architecture and Clean Code.

Development Team Leader
Practice UFFS, Chapecó, Brasil: 02/2022 – 10/2022

Practice UFFS: A university program to expand and consolidate technology and innovation

in the academic field, especially at the university.

- **Led a team** of five developers, focused on technical mentorship and professional development.

Full Stack Developer
Practice UFFS, Chapecó, Brasil: 03/2021 – 10/2022

- **Developed and maintained** several applications for use in the academic environment, including:
  - Mural: a web platform for service requests from the academic community to Practice, developed with Laravel.
  - Forms: a web platform for creating quick forms with real-time response tracking, developed with Laravel.
  - Maker: a web platform for creating various content such as brochures and banners using predefined templates, developed with Laravel.
  - Practice App: an app that centralizes the services of Practice, developed in HTML and JavaScript with the help of Framework7.
